## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Objections***

Claim 6 is objected to because of the following informalities: There is no prior mention of a "wheeled carriage" as referred to on line 3. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore,

the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Kretschmer et al.'547. Kretschmer discloses a self propelled apparatus (figures 1-7) for operating a working attachment "L", the apparatus comprising a ground engaging drive carriage 1, a support frame 12 attached to the drive carriage (as seen in figure 2-4), the support frame including a pair of rearwardly and upwardly extending side members 2, a boom (3 or 5) having an actuator (cable assemblies; 7,9,10) and two ends, one of the ends pivotally attached (via 4) to the side members and two positionable counterweights (11,21). Also, Kretschmer discloses the use of weights positioned on either side of the frame (as seen in figure 5a) as well as those weights being moveable (via telescoping member 15) as to change the center of gravity of the apparatus. Further, Kretschmer shows the apparatus having an operator support (inside the cab of the vehicle).
